ELSEVIER

Journal of Virological Methods 66 (1997) 317–319

Journal of Virological Methods

Volume contents

Volume 66 (1997)

Protocol

B.J. Cohen (UK)
Detection of parvovirus B19-specific IgM by antibody capture radioimmunoassay 1

Research Papers

M. Arivananthan, M. Yadav, S. Kumar (Malaysia)
Detection of HHV-6 genotypes by in situ hybridization with variant-specific oligonucleotide probes 5

K. Whitby, J.A. Garson (UK)
A single tube two compartment reverse transcription polymerase chain reaction system for ultrasensitive quantitative detection of hepatitis C virus RNA 15

G. Leone, H.B. van Schijndel, B. van Gemen, C.D. Schoen (Netherlands)
Direct detection of potato leafroll virus in potato tubers by immunocapture and the isothermal nucleic acid amplification method NASBA 19

C.-C. Wu, T.-L. Lin, A. Akin (USA)
Quantitative competitive polymerase chain reaction for detection and quantification of infectious bursal disease virus cDNA and RNA 29

I. Casas, A. Tenorio, J.M. Echevarría, P.E. Klapper, G.M. Cleator (Spain, UK)
Detection of enteroviral RNA and specific DNA of herpesviruses by multiplex genome amplification 39

L. Hesketh, A. Charlett, P. Farrington, E. Miller, T. Forsey, P. Morgan-Capner (UK)
An evaluation of nine commercial EIA kits for the detection of measles specific IgG 51

C. Matsumoto, K. Nishioka, T. Oguchi, S. Mitsunaga, N. Nojiri, K. Tadokoro, T. Juji (Japan)
Detection and quantitation of HBV DNA by semi-nested PCR in donated blood: comparison with HBV serological markers 61

D. Häuptli, L. Bruckner, H.-P. Ottiger (Switzerland)
Use of reverse transcriptase polymerase chain reaction for detection of vaccine contamination by avian leukosis virus 71

H. Vanderhallen, F. Koenen (Belgium)
Rapid diagnosis of encephalomyocarditis virus infections in pigs using a reverse transcription-polymerase chain reaction 83

S.E. Fong, P. Smanik, T. Thais, M.C. Smith, S.R. Jaskunas (USA)
Detection of specific human immunodeficiency virus type 1 Tat-TAR complexes in the presence of mild denaturing conditions 91

P. La Notte, A. Minafra, P. Saldarelli (Italy)
A spot-PCR technique for the detection of phloem-limited grapevine viruses 103

F. Condorelli, A. Stivala, R. Gallo, E. Musumeci, M.C. Scatà, L. Strano, M. Pennisi, G. Russo, A. Castro, G. Scalia (Italy)
Improvement in establishing the period of rubella virus primary infection using a mild protein denaturant 109

I. Alexandre, N. Zammatteo, P. Moris, F. Brancart, J. Remacle (Belgium)
Comparison of three luminescent assays combined with a sandwich hybridization for the measurement of PCR-amplified human cytomegalovirus DNA 113

S.D. Blacksell, R.A. Lunt, J.R. White (Australia)
Rapid identification of Australian bunyavirus isolates belonging to the Simbu serogroup using indirect ELISA formats 123

J.M. Hammond, P.G. Oke, B.E.H. Coupar (Australia)
A synthetic vaccinia virus promoter with enhanced early and late activity 135

J. Santti, T. Hyypiä, P. Halonen (Finland)
Comparison of PCR primer pairs in the detection of human rhinoviruses in nasopharyngeal aspirates 139

S.E. Fong, P. Smanik, M.C. Smith, S.R. Jaskunas (USA)
Cationic liposome-mediated uptake of human immunodeficiency virus type 1 Tat protein into cells 149

Short communication

A. Romero, B. Blanco-Urgoiti, F. Ponz (Spain)
Amplification and cloning of a long RNA virus genome using immunocapture-long RT-PCR 159

Erratum 165

Protocol

C. Mant, B. Kell, J.M. Best, J. Cason (UK)
Polymerase chain reaction protocols for the detection of DNA from mucosal human papillomavirus types -6, -11, -16, -18, -31 and -33 169

Research Papers

P.-C. Chang, Y.-L. Lee, J.-H. Shien, H.K. Shieh (Taiwan, ROC)
Rapid differentiation of vaccine strains and field isolates of infectious laryngotracheitis virus by restriction fragment length polymorphism of PCR products 179

M. Vatteroni, F. Maggi, A. Morrica, C. Fornai, M. Giorgi, M. Pistello, M. Bendinelli (Italy)
Comparative evaluation of five rapid methods for identifying subtype 1b and 2c hepatitis C virus isolates 187

J. Hinrichs, S. Berger, J.G. Shaw (USA)
Induction of antibodies to plant viral proteins by DNA-based immunization 195

T.M. Rehle, P. Mattke, G.N. Liomba, S. Krämer, G.M. Gershy-Damet, K. Konan, A. Sangare, L. Zekeng, J.M. Tsague, L. Kaptue, J. Eberle, L. Gürtler (Germany, Malawi, Côte d'Ivoire, Cameroon)
Evaluation of a quantitative double ELISA strategy for confirmation and differentiation of HIV infection 203

M.I. Vidal, M. Stiene, J. Henkel, U. Bilitewski, J.V. Costa, A.G. Oliva (Portugal, Germany)
A solid-phase enzyme linked immunosorbent assay using monoclonal antibodies, for the detection of african swine fever virus antigens and antibodies 211

C. Huang, Y.-S. Lin, J.-W. Cheng, T.-J. Chang (Taiwan, ROC)
Immunolocalization of the pseudorabies virus immediate-early protein IE180 by immunoperoxidase staining 219

K.W. Hasson, J. Hasson, H. Aubert, R.M. Redman, D.V. Lightner (USA)
A new RNA-friendly fixative for the preservation of penaeid shrimp samples for virological detection using cDNA genomic probes 227

C. Guillon, G. Oriol, R.A. Gruters (France)
Molecular characterization of HIV viruses generated after in vivo ligation 237

T. Maudru, K. Peden (USA)
Elimination of background signals in a modified polymerase chain reaction-based reverse transcriptase assay 247

V.S. Panangala, L. Liu, G. Sun, S.D. Worley, A. Mitra (USA)
Inactivation of rotavirus by new polymeric water disinfectants 263

S. Gratzl, C. Moroni, H.H. Hirsch (Switzerland)
Quantification of HIV-1 viral RNA and proviral DNA by isotopic competitive PCR 269

A. Jöns, T.C. Mettenleiter (Germany)
Green fluorescent protein expressed by recombinant pseudorabies virus as an in vivo marker for viral replication 283

E. Gobbers, K. Fransen, T. Oosterlaken, W. Janssens, L. Heyndrickx, T. Ivens, K. Vereecken, R. Schoones, P. van de Wiel, G. van der Groen (Belgium)
Reactivity and amplification efficiency of the NASBA HIV-1 RNA amplification system with regard to different HIV-1 subtypes 293

Short communications

D. Paton, G. Ibata, J. Sands, A. McGoldrick (UK)
Detection of transmissible gastroenteritis virus by RT-PCR and differentiation from porcine respiratory coronavirus 303

H. Heider, C. Schroeder (Germany)
Focus luminescence assay: macroscopically visualized foci of human cytomegalovirus and varicella zoster virus infection 311
